

VICTOR PAUL NOEL

Sr. Software Engineer | Full-Stack Developer

Dieppe, New Brunswick, Canada

dev.vpauln@gmail.com | linkedin.com/in/vpnoel

CAREER OBJECTIVE

Seasoned in aligning technology solutions with business objectives, I specialize in analyzing requirements, designing architectures, and guiding project teams to deliver secure, scalable, and cost-effective outcomes. By leveraging emerging technologies and maintaining enterprise architecture principles, I drive organizational growth, streamline processes, and support strategic goals in a collaborative environment.

EXPERIENCE

Senior Software Engineer

Full Scale

📅 05/2025 – Current 📍 Cebu PH

- Spearheaded a specialized project for a dedicated client with custom requirements and development
 - Collaborated with multiple engineers with the internal timeclock project
 - Supported different client projects (Legacy / Modern) in 911 Team for faster escalations
-

Developer

University of Fredericton

📅 09/2024 - 11/2024 📍 Fredericton, New Brunswick, CA

- Coordinate with LCE on the development of storyboard for SCORM
 - Development of course templates and ensure fluidity of Web UI with pixel perfect details
-

Software Engineer (Freelance)

Added Innovation

📅 09/2024 – 05/2025 📍 Springfield, MO, US

- Integration of MS Teams with Azure Bot / OpenAI / LUIS for Company Chatbot
 - Provide development support feature for Engineering firm
 - Management of Azure Resources, Deployment & Configuration
-

Senior .NET Developer

Kaczmariski Group

📅 03/2023 - 08/2024 📍 Wroclaw, PL

- Spearheaded the development of data retention feature for financial statement module
- Collaborated closely with cross-functional teams to develop a highly complex finance solution software, ensuring data integrity.
- Pioneered a microservice-based finance solution project built on an experimental environment with OpenShift and Docker
- Authored comprehensive unit and functional tests for new software modules, leading to a 30% decrease in post-deployment bugs detected
- Leading project status updates, manage ticket and tasks adjustments, facilitate sprint planning discussions and conduct reviews and presentations

Software Engineer

Added Innovation

📅 05/2021 - 04/2023 📍 Springfield, MO, US

- Spearheaded a legacy redesign project for Automated Engineering System to a modern Angular Frontend & C# .NET Core Backend
- Designed and revamped a fresh look UI based on Angular Material
- Optimized SQL database queries and restructure database schema to integrate audit fields and enhanced data integrity
- Managed project delivery timelines, task board updates, code reviews, and maintenance of coding standards.
- Streamlined development and deployment procedure, reducing operation and maintenance cost from IaaS to SaaS based.

Senior Software Developer

CoDev Philippines

📅 09/2016 - 05/2021 📍 Cebu, PH

- Pioneered on building of Language Assessment Software from initial scratch ideas to full completion
- Volunteered to spearhead the migration of legacy PHP code to C# .NET and the Microsoft stack.
- Led the migration of CRM system from an AngularJS to Laravel with Angular Typescript based stack
- Contributed and engineered internal projects for an outsourcing, social media handler, and education companies

Software Engineer

Cloud Employee

📅 08/2015 - 09/2016 📍 Cebu, PH

- Developed and engineered a social media presence checker application using Python/Django stack, integration of social media APIs such as Facebook, Twitter, and LinkedIn
- Led a team of 3 engineers to develop and enhance a book publishing management software and migration of process from FTP transfers to a git approach

DevOps Engineer / Software Developer

JobTarget

📅 08/2012 - 06/2015 📍 Cebu, PH

- Pioneered the redesign of a legacy spidering project, transitioning from Python to CasperJS/PhantomJS stack and incorporated the ETL process of handling data
- Led the DevOps team in Philippines to develop and support IT Infrastructure with Elasticsearch, Logstash and Kibana
- Facilitated requirements gathering, collaboration with business teams on the development of spider scripts to crawl on customer ATS

Systems Engineer

DirectAccess Corporation

📅 04/2012 - 07/2012 📍 Cebu, PH

- Managed network switch incidents to ensure business continuity.
 - Developed software application support for BPO clients and Internal tool support
 - On-site management of IT infrastructure and support
-

Software Development Intern

Asian College of Technology

📅 10/2011 - 03/2012 📍 Cebu, PH

- Spearheaded on the development of Grading System: From UI design, application development to completion and deployment.
- Supported and developed school administration tools such as Enrollment system, School Website & Finance system

Lead PHP/Wordpress Developer (Freelance)

Cyberknights Solutions Inc.

📅 02/2010 - 01/2012 📍 Cebu, PH

- Designing web templates in Photoshop PSD and conversion into a fully functional Wordpress template
- Led a team of 3 in custom development of CRM and client applications

PROJECTS

- AI Teams Chatbot – AI Integrated chatbot to support time tracking, auto schedule, organization lookups
- Redesigned Engineering Software – Structural Engineering software with Time Tracking, Power BI Reports & Automated Engineering Workflow, and Sharepoint Integration
- Spider Redesign Project – From Legacy Python spidering to ETL Implementation (NodeJS/PHP) to scrape jobs from ATS and job sites
- Language Assessment Software – Features a Language Screening, Learning & Development Language Certification with speech-to-text implementation and scoring with international standards
- Social Media Platform Management System – Features a scheduler, management control for multiple social platforms under one central location.
- Book Publishing System – Europe book publishing and management system for esteemed authors.
- Infrastructure Support Tool System – Support tool for IT Infrastructure, multiple dashboard reports, automation tools for deployment
- Internal ERP System – Customized ERP software for Internal usage on company
- Asset Management – Customized asset management solution for heavy equipment, organizations, reliability engineering
- Student Management System – Software to manage students, school bus, and class assignments.
- Data Retention System – Microservice software support to maintain data integrity and integration to PowerBI for credit and finance reports.

KEY ACHIEVEMENTS

Pioneered a project from scratch

Sole responsibility for a key project that resulted in a 180% upsurge in user engagement through intuitive feature enhancements.

Lead a Redesign Project

Redesigned a legacy software and improved process workflow and cuts 75% of manual paperwork and sped up engineering process.

Recognized for Optimizing Cost

Led a migration from IaaS to SaaS, streamlining the deployment process and cutting expenses by almost 35% while significantly improving performance.

Innovation in Spidering Data

Pioneered a spidering project redesign, achieving a 75% improvement in data accuracy and ensuring 100% detail capture.

SKILLS

- Agile Scrum Methodology
- Angular
- Azure AI / Bot
- Azure DevOps / Pipelines
- C# .NET
- CI/CD (TeamCity/ Octopus/Azure)
- Dapper
- Docker
- Entity Framework
- GIT / SVN
- HTML / CSS
- Javascript / Typescript
- JIRA
- Microservices / Monolithic Architecture
- Microsoft Azure
- NodeJS / NextJS
- PHP
- PowerBI
- Powershell / Bash
- SQL
- Unit Test
- Python / Django
